

**Reducing surgical costs so you
can focus on what matters.**

Navigating Healthcare **Costs Together**

With flat to declining reimbursement rates and rising inflation affecting consumable costs, **we recognize the need to find innovative solutions that improve your profit margins without compromising on quality.**

Sharpoint delivers on savings, with quality and precision.

Designed to provide superior performance at an attractive price point. We've engineered Sharpoint to match and even exceed the quality of premium sutures in the market, while ensuring it remains cost-effective for your practice.

Precision engineering

Manufactured using state-of-the-art technology and adheres to the highest quality standards. Its sharp and consistent needles, combined with a smooth thread for easy tissue passage, enable precise and reliable wound closure.

It's the **right decision**

By choosing **Sharpoint**, you are making a strategic move towards reducing your suture spend without sacrificing the quality you demand for your patients.

Inflation is outpacing reimbursement rates

"The needle penetrated the tissue with ease even after more than 15 passes. A dependable needle that I would be happy to use again."

Dr. Robert Colgrove
PLASTIC SURGEON
Vinings Surgery & Hair
Restoration Center
Atlanta, GA

"I have been using Express Gut in my practice for two years. It's more affordable than other brands and I don't have to sacrifice needle quality."

Dr. Joseph Niamtu
PLASTIC SURGEON
Niamtu Cosmetic Facial
Surgery Midlothian, VA

"We have been using Sharpoint sutures in our surgical center for over a year. The suture quality is equivalent to that of Ethicon."

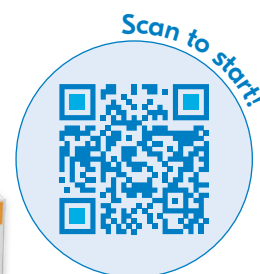

Dr. Serafin M. DeLeon III, MD
ORTHOPAEDIC HAND
& UPPER EXTREMITY
Illinois Bone & Joint
Institute Gurnee, IL

SharpPoint[®] SURGICAL SUTURE

Remarkable performance and exceptional value.

The Right Stitch, Every Time.

SharpPoint absorbable sutures shall be used in general soft tissue approximation where the use of absorbable suture is appropriate. Non-absorbable sutures are indicated for use in general soft tissue approximation and/or ligation. Monoderm & PDO are not for use cardiovascular or neurological tissues, microsurgery or ophthalmic surgery. Polysyn and Gut are not indicated for cardiovascular or neurological procedures. POLYSYN FA™ is not intended for use in ligation, ophthalmic, cardiovascular or neurological procedures. As with all surgical sutures, adverse effects may include wound dehiscence, failure to provide adequate wound support, infection, minimal acute inflammatory tissue reaction at the wound site amongst others. For complete indications, contraindications, warnings, precautions, and adverse reactions, refer to the instructions for use (IFU).
